Vizrt's policy is one of continual development, so the content of this document is periodically subject to be modified without notice. These changes will be incorporated in new editions of the publication. Vizrt may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time.
Vizrt may have patents or pending patent applications covering subject matters in this document. The furnishing of this document does not give you any license to these patents.

Antivirus

Vizrt does not recommend or test antivirus systems in combination with Vizrt products, as the use of such systems can potentially lead to performance losses. The decision for the use of antivirus software and thus the risk of impairments of the system is solely at the customer's own risk.

There are general best-practice solutions, these include setting the antivirus software to not scan the systems during operating hours and that the Vizrt components, as well as drives on which clips and data are stored, are excluded from their scans (as previously stated, these measures cannot be guaranteed).

Technical Support

Contents

1 Reality Connect 1.1.0

Release Date: 2024-10-30

These are the release notes for Reality Connect version 1.1.0. This document describes the user-visible changes that have been made to the software since Reality Connect 1.0.0.

> ℹ️ **Note:** This version of Reality Connect requires Viz AI Terminal 1.1 and Viz AI Core 1.6.

1.1 Features

1.1.1 Talent Reidentification

Talents are now internally remembered, and when they reappear in the scene, assigned to the same model as they were before. This feature requires the talents to appear somewhat different, specifically in size or color.

2 Documentation

Documentation for Reality Connect and related products are available on the Vizrt FTP and on the Vizrt Documentation Center:

- Viz Engine
- AI Terminal
- Reality Connect

3   Support

Support is available at the Vizrt Support Portal.
