No part of this software, documentation or publication may be reproduced, transcribed, stored in a retrieval system, translated into any language, computer language, or transmitted in any form or by any means, electronically, mechanically, magnetically, optically, chemically, photocopied, manually, or otherwise, without prior written permission from Vizrt.

Vizrt specifically retains title to all Vizrt software. This software is supplied under a license agreement and may only be installed, used or copied in accordance to that agreement.

Disclaimer

Vizrt provides this publication “as is” without warranty of any kind, either expressed or implied. his publication may contain technical inaccuracies or typographical errors. While every precaution has been taken in the preparation of this document to ensure that it contains accurate and up-to-date information, the publisher and author assume no responsibility for errors or omissions. Nor is any liability assumed for damages resulting from the use of the information contained in this document. Vizrt’s policy is one of continual development, so the content of this document is periodically subject to be modified without notice. These changes will be incorporated in new editions of the publication. Vizrt may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time.

Vizrt may have patents or pending patent applications covering subject matters in this document. The furnishing of this document does not give you any license to these patents.

Antivirus

Vizrt does not recommend or test antivirus systems in combination with Vizrt products, as the use of such systems can potentially lead to performance losses. The decision for the use of antivirus software and thus the risk of impairments of the system is solely at the customer's own risk.

There are general best-practice solutions, these include setting the antivirus software to not scan the systems during operating hours and that the Vizrt components, as well as drives on which clips and data are stored, are excluded from their scans (as previously stated, these measures cannot be guaranteed).

Technical Support

Release Date: 2024-11-22

We're thrilled to announce the launch of **Web Applications 2.1**, packed with exciting new features, polished designs, and productivity-enhancing improvements. This release continues to refine your experience, with notable updates to **Showmaker**, expanded functionality across our applications, and much more!

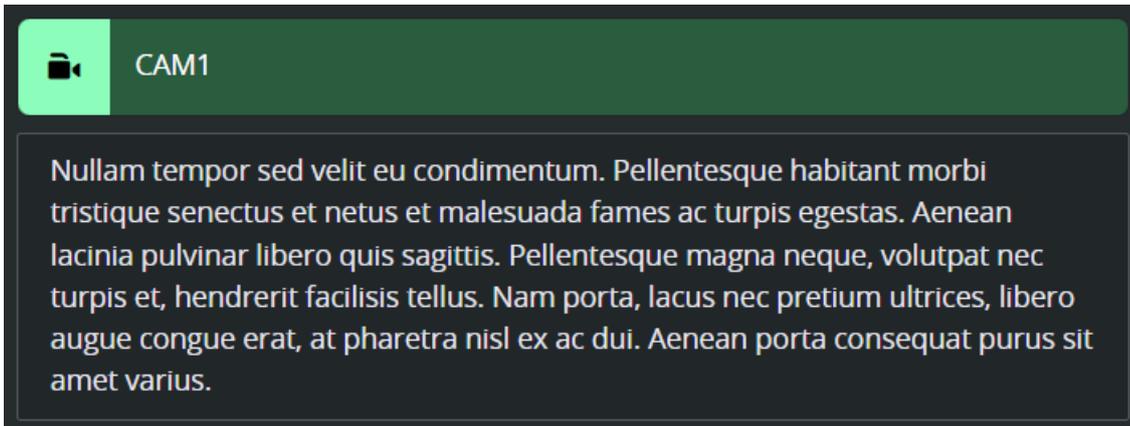

We value your insights and encourage you to share your feedback, feature requests, or comments to help us continue to innovate.

1 Showmaker

Showmaker is revolutionizing how you create rundowns for Mosart. Although still in Early Access, it's now closer than ever to being production-ready. Here's what's new:

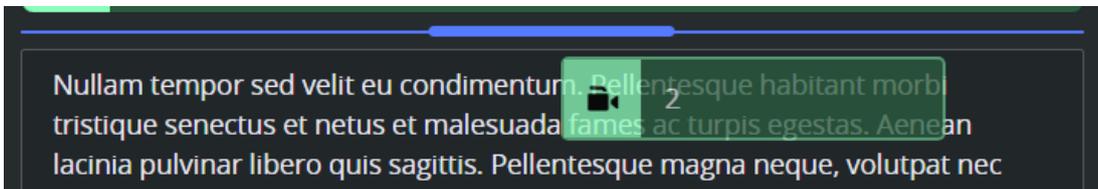

Script support

Write scripts for each story directly within Showmaker, adding a new dimension of editorial control.

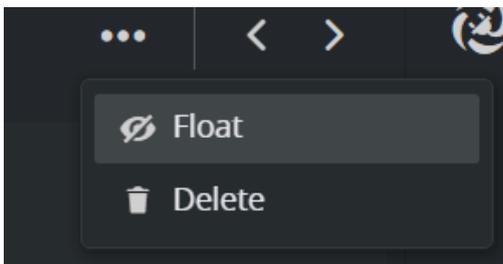

Add templates using drag and drop

Now, you can drag and drop primary items anywhere in your story. Say goodbye to static "Add to Story" functionality and hello to seamless placement.

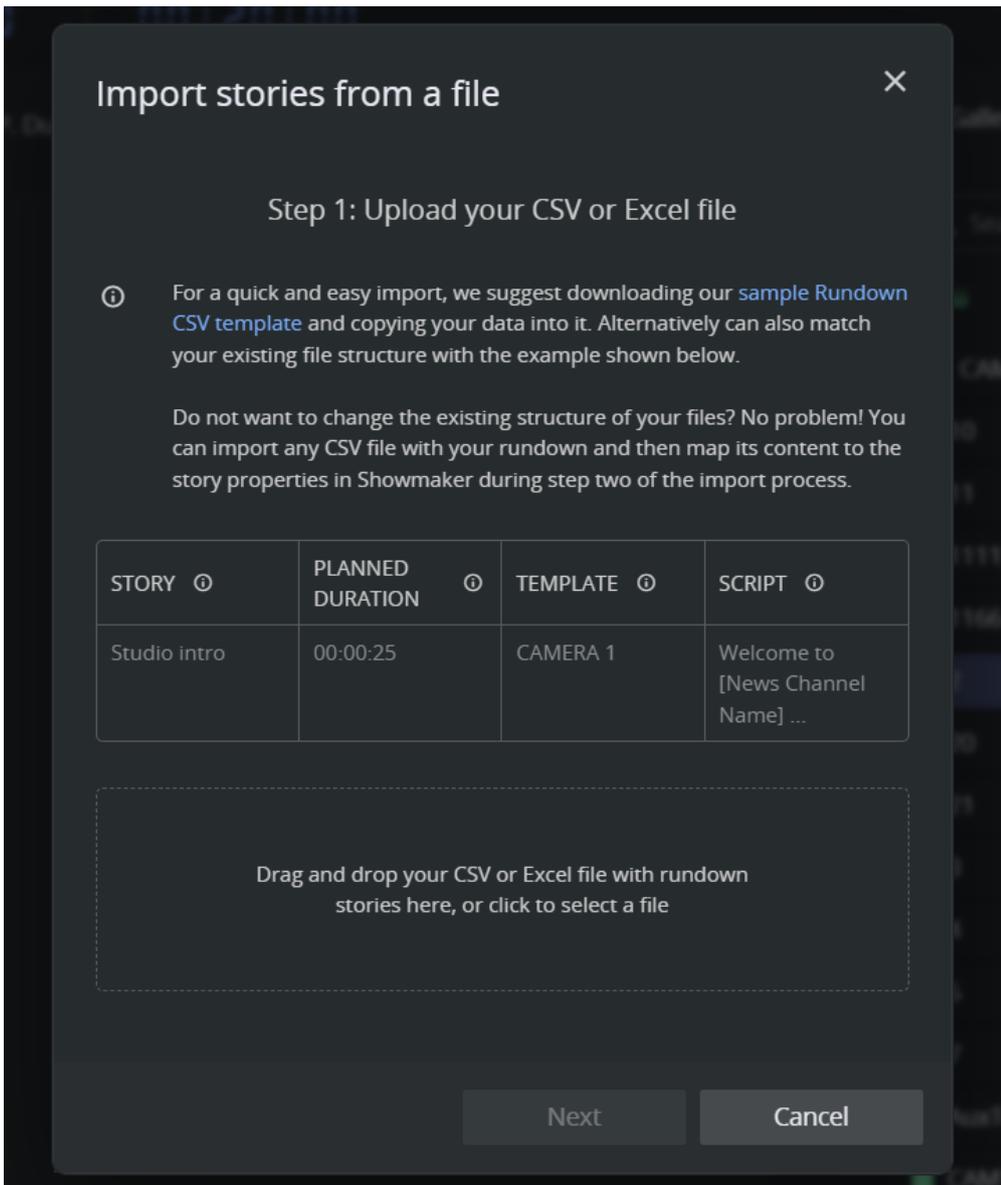

Floating stories

Keep your rundown flexible! Stories can now be marked as "floating," making them invisible to Mosart without deleting them.

Excel import

Import shows planned in Excel files directly into Showmaker, streamlining your workflow.

Keyboard Shortcuts

Effortlessly navigate the UI with our new keyboard shortcuts, designed for speed and convenience.

Keyboard Shortcuts

Home:

- Select rundown: ↑/↓
- New rundown: N or Insert
- Delete rundown: Delete or Backspace

Rundown Editor:

- Navigate stories: Shift + ↑/↓
- Add Story: N or Insert
- Rename Story: E
- Reorder story: Shift + Alt + ↑/↓
- Delete story: Shift + Delete or Shift + Backspace
- Navigate items: ↑/↓
- Reorder item: Alt + ↑/↓
- Delete item: Delete or Backspace
- Navigate home: H or Home
- Edit Rundown: Shift + E
- Toggle Manual Assets: M

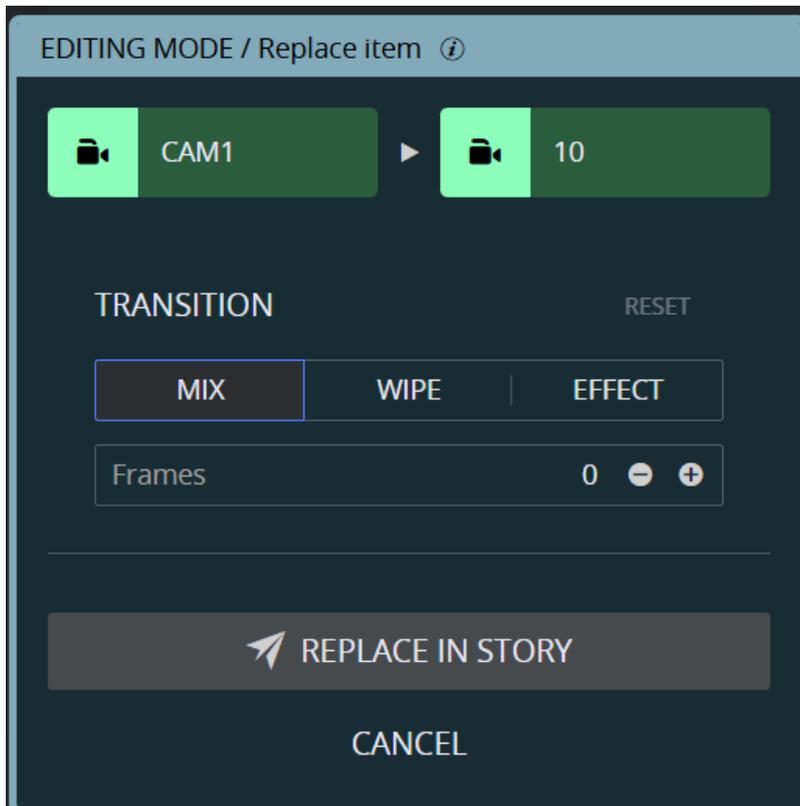

Show keyboard shortcuts: K

2 NRCS Plugin

The NRCS Plugin just got smarter and faster with these improvements:

Replace item

Editing items in the plugin now clearly indicates when you're replacing instead of updating, minimizing errors.

Keyboard Shortcuts

Speed up your workflow with new shortcuts tailored for efficiency.

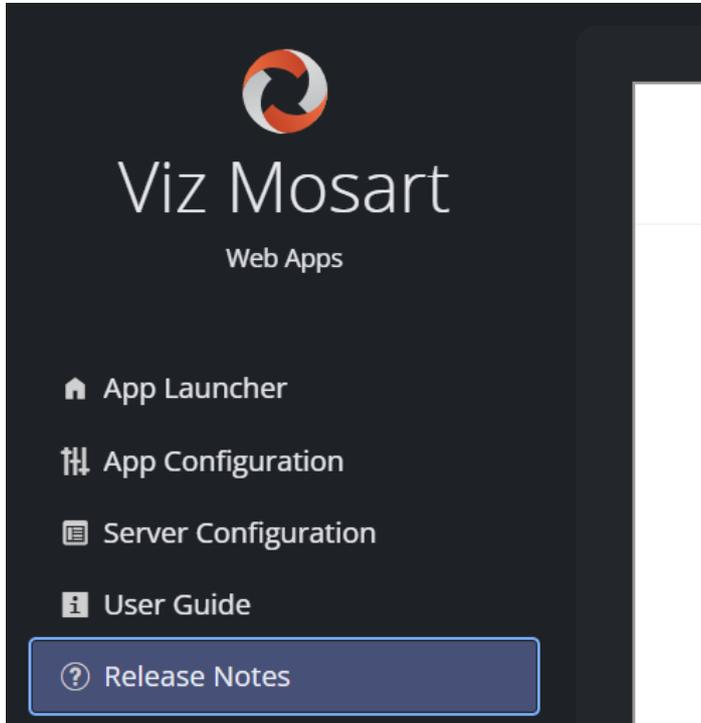

COMMANDS removed

The COMMANDS template type has been deprecated. If this impacts your workflow, please reach out to our support team for assistance.

3 Web Apps

Release notes in Config Tool

Stay informed with integrated release notes accessible directly in the Config Tool.

Logging to disk

New log files enable easier diagnostics and issue resolution.

4 Bug Fixes

- Typo in NRCS Plugin MOS object for secondary items lead to extra newsroom variable when editing the MOS object ([MOSART-12690](#))

5 Installation And Upgrade Process

- **Installation:** To download this version, please visit the Vizrt FTP site at download.vizrt.com and navigate to */products/VizMosart/Latest Version/WebApplications/*.
- **Upgrade:** The installer manages the upgrade, automatically removing older versions of **Vizrt Mosart Web Applications** and **Vizrt Mosart Web Applications Configuration Tool** before installing the new package. Remember to *close* any running version of the Vizrt Mosart Web Applications Configuration Tool before upgrading.

6 System Requirements & Documentation

- Ensure compatibility with Windows 10, Windows Server 2022, and latest Chrome/Edge for a seamless experience across all web applications.
- The NRCS Plugin should work with any version of Viz Mosart. NRCS Plugin with Viz Pilot Edge requires Viz Pilot Edge 3.1 or later.
- The Timing Display needs at least Viz Mosart 5.0.3.
- The Rundown Viewer needs at least Viz Mosart 5.1.0.
- Detailed user guides are accessible within each application and via [the Vizrt Documentation Center](#) for the latest insights and instructions.

7 Support

Support is available at the [Vizrt Support Portal](#).
