2 Viz Vectar Plus – Live Production 1.0.0

Release Date: 2021-06

These are the release notes for Viz Vectar Plus - Live Production version 1.0.0. This is the first release of Viz Vectar Plus - Live Production.

2.1 Known Issues

- MIX output rotation settings not working correctly over SDI when resolution is manually set.

2.2 Bug Fixes

- Streaming and Exporting to YouTube has been fixed.
- Streaming login browser compatibility with external site controls is improved.
- Corrected typo in LivePanel.
- Importing variable frame rate clips no longer takes longer than necessary.
- B frames are no longer incorrectly included in Baseline H.264 recordings.
- TextSlider no longer takes two clicks to perform some operations.
- Streaming timecode now reports correctly when using encoders at different framerates.
- Fixed rare issue where attempting to click away from a window would temporarily freeze the active window.
- Fixed issue where KVM would sometimes fail to start.
- Teleprompter now shows up as a source even before a script is loaded.
- Animated framebuffer on screen speed controls have been restored.
- When Transitioning off, Autoplay now uses the delegates rather than perform a background transition.
- Storing and Recalling PTZ presets from Control Surfaces is now working as intended.
- Vimeo no longer incorrectly appears as a *Clips Preset* when configuring some Export Presets.
- The NDI KVM now properly sends audio from the default Windows Playback device.
